## CHILDREN AND ADULTS: IT'S TIME TO ACT2GETHER!

If children and adults act as competent partners in addressing today's challenges, we can create a world that is fairer, more sustainable, and where everyone can realise their unique potential.

ACT2gether is an initiative that promotes partnership between generations in all environments as a way to address some of the challenges we face today. It aspires to become a hub that gathers, shares and strengthens inspiring examples of intergenerational partnership in spaces like education, health, family, justice or art.

ACT2gether is an intergenerational approach to fulfil children's right to participate by placing the potential of partnership between children and adults at the centre.

## 2GETHERLAND, A SPACE WHERE AGE IS NOT A BARRIER

2getherLAND is an event imagined, hosted, and evaluated by a team of child and adult volunteers.

2getherLAND is the gathering activity of the ACT2gether. After 2getherLAND Germany (Oct. 2019), The Netherlands will host the first 2getherLAND Global, inviting people from all generations and from around the world to come and co-create the future of ACT2gether as an international initiative.

## GOALS

These are the questions we want to explore with about 240 children and adults from all over the world:

- How can we together create an international movement that supports partnership between children and adults in creating a fair and sustainable world?
- What are the conditions that allow children and adults to act as competent partners in improving their lives and communities?
- What are the skills and attitudes needed for both children and adults to act in successful partnerships?

2getherLAND contributes to realizing children's rights and well-being, and explores how intergenerational partnerships can help achieve the Sustainable Development Goals.

## CO-CREATE ACT2GETHER WITH US!

The programme is built on two pillars:

*Strategy:* Participants will co-create a strategy for creating international and local initiatives that promote partnership between children and adults as means to achieve greater fairness and sustainability. Come shape the future of this international movement!

*Capacity:* You will learn tools and skills that will help you and your organisation to imagine, plan and implement projects through partnership between children and adults. This includes topics like shared decision-making, planning, and evaluation for all generations, as well as individual skills and attitudes.

**Don't miss this opportunity to become part of something bigger, and create real change!**
